

GLYPHOMATE® 41

WEED & GRASS KILLER *plus* AQUATIC HERBICIDE

The “all-in-one” non-selective herbicide

WHAT IT IS

GlyphoMate® 41 Weed & Grass Killer plus Aquatic Herbicide is a non-selective, post-emergent herbicide that provides excellent control of more than 200 listed grassy and broadleaf weeds. Featuring a built-in surfactant, and labeled for both aquatic and terrestrial use, GlyphoMate 41 is ideal for weed control in and around ponds and lakes, and in landscape and renovation areas.

GlyphoMate 41 controls weeds that have emerged above the water line in aquatic areas, and there is no restriction on the use of treated water for irrigation, recreation, or domestic purposes. It's rainfast in 6 hours, and you can reseed turf immediately or after 7 days if tillage is necessary.

WHAT IT DOES

GlyphoMate 41 controls:

- Bermudagrass
- *Poa annua*
- Crabgrass
- Clover
- Kudzu
- Poison ivy
- Cattail
- Many more grasses, weeds, and woody brush as listed

Ideal for use on:

- Outdoor residential areas
- Non-cropland areas
- Golf courses
- Rights-of-way
- Orchard floors and nurseries
- Fresh and brackish water
- Aquatic areas, ditches, ditchbanks
